O’Keefe Media Group Uncovers Potential MASSIVE Money Laundering into Political Campaigns

4/11/2023 Research found Mr. Ger**** Fa*** having donated over 17,881 times in two years.

Jan 2015 to Nov 2016: 17 Donations for $251

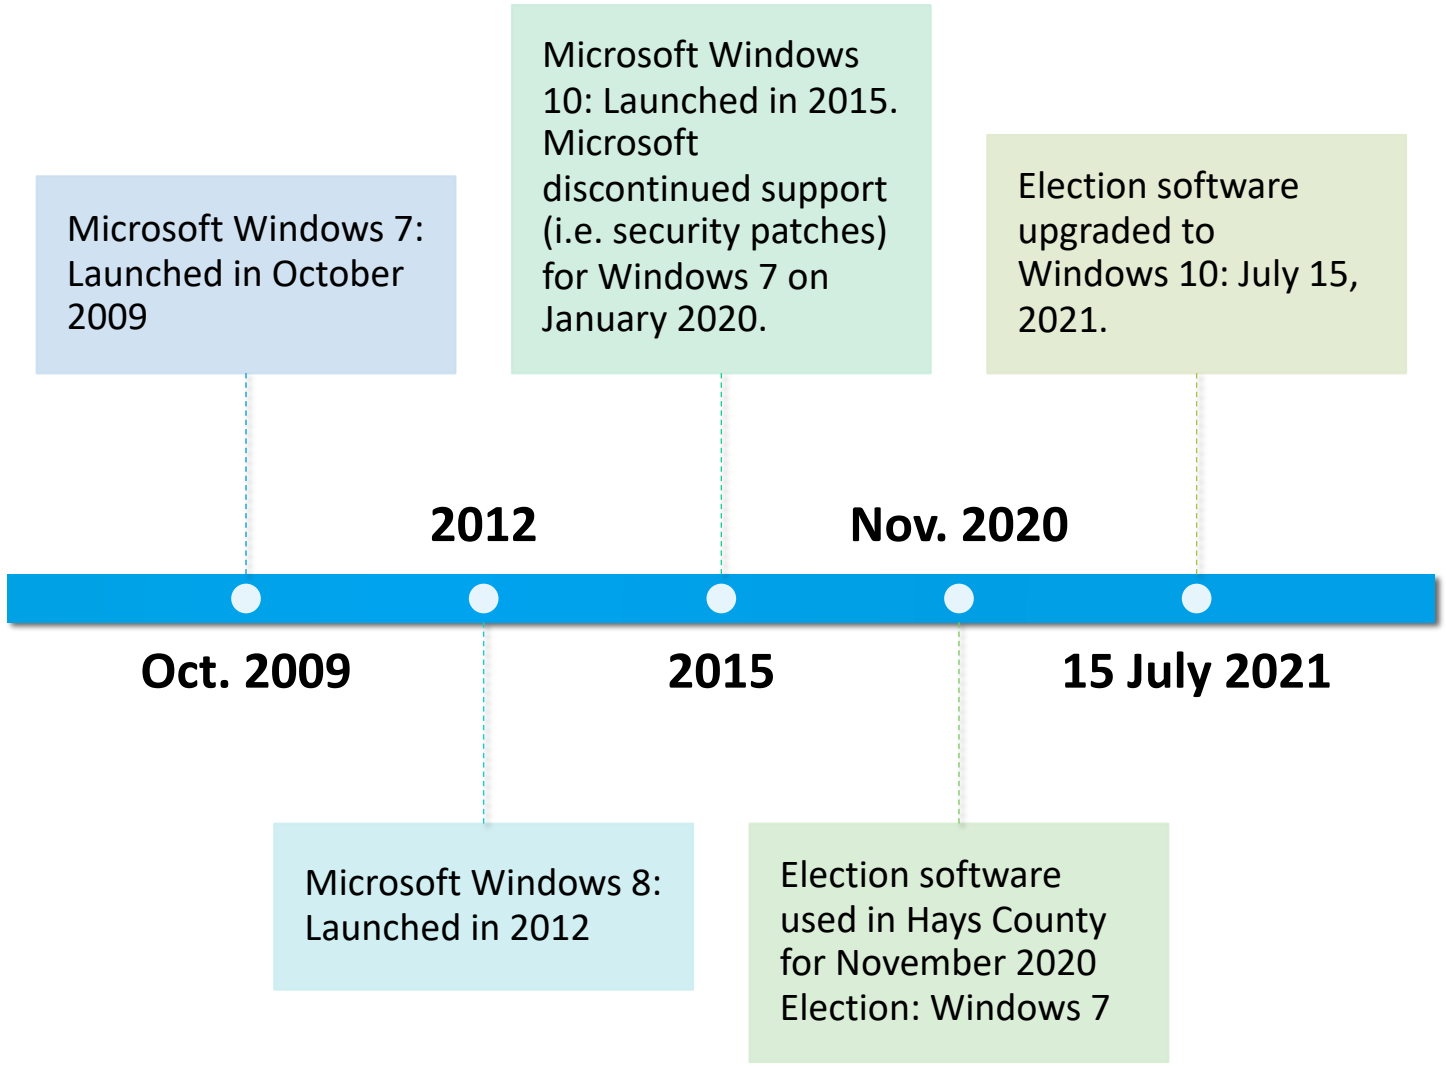
Mar 2017 to Dec 2018: 1110 Donations for $12,917.32

Jan 2019 to Dec 2020: 7878 Donations for $105,157.79

Jan 2021 to Feb 2023: 10,556 Donations for $129,433.75

Canvasser impression: Some of Mr. Farr’s donations have likely been split between beneficiaries. Need to do an analysis of the donations.

Hays County Elections - Operating System



Machines are at the Root of the Problems

The machines can affect the integrity of the election process by enabling others to monitor/track how votes are cast.

Using the voter roll, machines can be programmed to create votes from individuals that did not vote.

Machines can be programmed to create votes from individuals that live in other counties and from individuals who do not exist.

Machines can be programmed to assign different VUIDs to the same individual.

Machines can be manipulated to increase the votes for one candidate and decrease the votes for another.

Machines allow elections officials to avoid responsibility.

Machines are at the Root of the Problems

By creating a code which can be programmed in any manner, the machines do not allow for verification of the actual physical votes for each candidate and the election results.

Machines allow external profit-making companies to manage the election process, resulting in election integrity issues, such as the manipulation and erasing of data.

The software used by the machines is covered by proprietary rights and thus not shared with the voters and public officials.

Solutions for In-Person Voting*

Return to the following proven election practices according to existing election law in Texas:

1. Sequentially numbered paper ballots printed on secure paper (TEC 52.062)
2. Hand-marked ballots that are retained according to law (TEC 66.058, 52 USC 20701);
3. Precinct voting only; no county-wide polling locations; reduce the size of precincts (TEC 43.001-43.062);
4. No early voting; local jurisdictions may opt for a local holiday (TEC 85.001-85.072);
5. Hand-count the paper ballots and produce results by 11 pm on election day by hiring and paying local election workers (TEC 67.001-67.017);

2. Clean the voter rolls

*All items are within the authority of the County Commission, the Hays County Election Commission, and the Hays County Election Board.

Solutions for Ballot by Mail Voting*

Texas Election Code requires a correctly completed Application for Ballots by mail (TEC Ch. 86)

- Attach the Application to its corresponding Carrier Envelope.
- Sort the applications and envelopes by precinct, then alphabetically or by VUID number and file in such a way as to be able to go back and audit the records.
- Generate a list of rejected Applications and mark on the Application the reason for the rejection (TEC Ch. 86)
- Adhere to the law when reviewing Applications by witnesses and assistants (TEC Ch. 84)

*All items are within the authority of the County Commission, the Hays County Election Commission, and the Hays County Election Board.
